

Class XII

Bricks, Beads and Bones
The Harappan Civilization

NCERT - Class XII
Themes in Indian History - Part I
Chapter I.

Harappan seal - Made of Steatite

- contains - animal motifs.

- signs from script
(undeciphered)

Distinctive objects: seals, beads, weights, stone blades,
baked bricks

Found in: Afghanistan, Jammu, Baluchistan,
Gujrat.

Dated b/w: 2600 BCE to 1900 BCE

1. Beginnings:

- Break b/w Early Harappan & Harappan civilization

- Evidence of - distinctive pottery

- agriculture

- pastoralism.

2. Subsistence Strategies:

- Wide range of plants & animals.
- Charred grains & seeds
- Grains : wheat, barley, lentils, chickpea, sesame,
Millet, in Gujrat,
Rice
- Domesticated animals : cattle, sheep, goat, buffaloes,
pig.
- Wild species: boar, deer, gharial.
- Bones of fish and fowl also found.

2.1 Agricultural technologies:

- Bull was known (seals & terracotta sculpture)
- Oxen used for ploughing (plough models in Haryana)
- Ploughed field at Kalibangan (Rajasthan)
↓
- Furrows at right angles (two ^(diff) crops together)
- Irrigation facility
 - canals - Shortughai (Afghanistan)
 - wells - Punjab, Sindh.
 - water reservoir → Dholavira (Gujrat)

3. Mohenjodaro: A planned urban centre.

<u>Citadel</u>	<u>Lower town</u>
- small but higher	- large but lower.
- buildings constructed on high mud brick platforms	- on low mud brick platforms

- First planned and implemented later.
- Both citadel & lower town was walled.
- Bricks :
 - sundried or baked
 - Standardized ration
 - length = 4 times height
 - breadth = 2 times height.

3.1. Laying out drains:

- Planned drainage s/m.
- Roads & street in grid pattern
- Streets with drains laid first & then houses built.

3.2 Domestic Architecture

- Lower town - residential buildings
- Courtyard → rooms on all sides
- Privacy given importance
 - ↳ No windows in ground floor
 - No views of interior or courtyard from main door.
- Every house own bathroom
- Staircases in some houses to go to roof.

3.3 Citadel

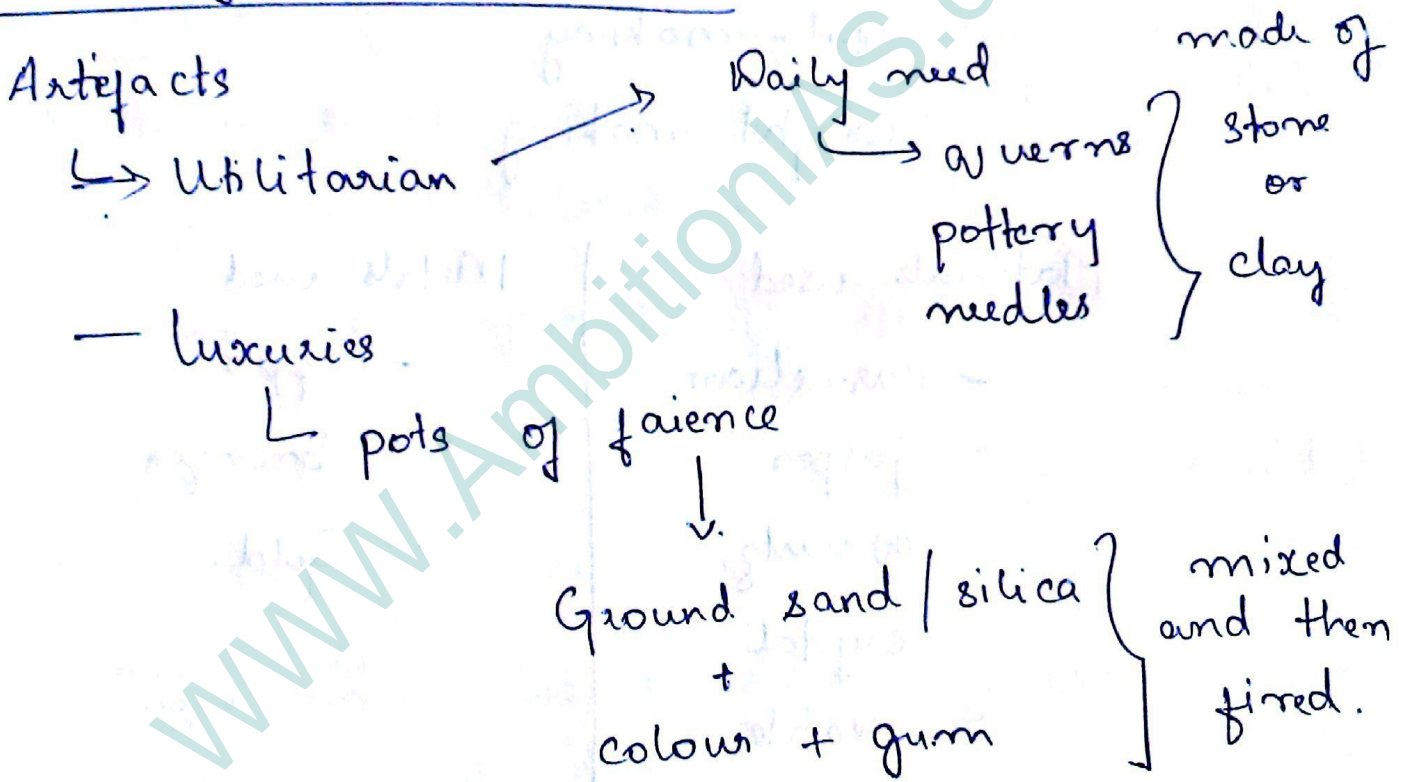

- Used for special public purposes
 - Warehouse
 - Great Bath
 - ↳ Special ritual bath.

4. Tracking Social Differences.

4.1 Burials

- Dead buried in pits
- Jewellery found in few instances
- It appears - Harappans did not believe in burying precious things with dead.

4.2 Looking for "luxuries"

- Luxurious items found in large ~~site~~ sites - ex: Mohenjodaro / Harappa

- Gold too rare (found at Harappan sites)

5. Finding out about craft production

Chanhudaro :- small settlement (less than 7 hectares)

- Devoted to craft production

- bead-making

- shell-cutting

- metal-working

- seal-making

- weight making.

- Materials used

- carnelian

- jasper

- quartz,

- crystal

- steatite

Metals used-

- copper

- bronzes

- Gold.

- Decorated by

- incising

- painting

- designs etched onto them.

- Nageshwar } specialized centres for making
Balakot } shell objects.

5.1 Identifying centres of production

- Raw materials,
- unfinished objects
- waste objects (one of best material)

6. Strategies for procuring material

- Bullock carts - means of transporting material from different places

6.1 Materials from sub-continent & beyond

Settlements in areas where resources available

- Nageshwar & Balakot - Shell
- Shontughai (Afghanistan) - Lapis lazuli
(blue stone highly valued)
- Lothal - Carnelian
- Rajasthan - Steatite, metal; copper
- Gujrat - Steatite.
- South India - Gold.

6.2 - Contacts with distant lands

8

- Oman - Copper.

↳ Chemical analysis of Omani copper & Harappan artefacts - same origin

- Harappan jar coated with thick layer of black clay found in Omani sites.

- Mesopotamian texts mention regions:

- Magan - (Oman)

- Dilmun - (Bahrain)

- Meluhha - (Harappan region)

↳ Products

- carnelian.

- lapis lazuli

- copper

- gold

- varieties of wood.

7. Seals, Script, Weights.

9

7.1 Seals and sealings.

- long - distance communication
- Bag with sealing intact
 - product not tampered
 - identity of sender.

7.2 An Enigmatic Script

- Inscriptions are short (longest containing 26 signs)
- Written from right to left.
- Undeciphered to date.

7.3 Weights

- Precise system of weights
- Made of stones called chert
- Cubical
- Denominations of weight were binary
(1, 2, 4, 8, 16 . . . , 12,800)
- Metal - scale-pans found.

8. Ancient Authority:

- Indications of authority present
 - planned towns
 - uniform, standardized bricks
 - mobilizing labour to build towns
 - settlements strategically set-up at specific location.

8.1 Palaces & Kings:

- Priest kings could be present till Mesopotamian history.
- No concrete evidence.

9. The End of the Civilization

1800 BCE - 1900 BCE

↳ Changes started showing up.

- Disappearance of distinctive artifacts
- Reasons:
 - climatic change
 - deforestation
 - excessive floods
 - shifting / drying up of rivers
 - overuse of landscape.
